

Communication and language

During their time at nursery, your child will have many opportunities to talk with their peers and the adults around school. We will encourage them to listen carefully and attentively whilst taking turns to respond. They will take part in games, nursery rhymes, counting songs and musical activities. They will learn new vocabulary through stories, play and singing.

Personal Social and Emotional Development

Your child will begin to greet others and say goodbye when they are dropped off to Nursery. They will learn to express their own interests and needs. They will begin to make friendships and play alongside their peers. They will learn our classroom routine and school values. We will identify different emotions and learn different strategies to manage them.

Tapestry

We use Tapestry to share important information and show you all the amazing things your child has been up to at Nursery!

PLEASE click on the links when you receive a notification or you may miss out. Mrs Bloom can help to support if you are having technical issues.

Physical Development

Our outdoor area is always used which means your child will be active every day. We will be encouraging independence when putting on and taking off their coats. Children will also have a choice of which fruit each day and whether they would like milk or water. We will also encourage self care skills, which include toileting and handwashing. Your child will begin to have an awareness of space, risk taking and how to move safely between indoor and outdoor areas. Children will develop their fine motor opportunities through mark making with Kinetic Letters, painting, junk modelling and construction.

Reading

We will have daily Storytime opportunities. We will investigate books and how to hold them. We will have opportunities to retell stories using Tales Toolkit. We will learn new vocabulary, whilst listening to a range of different texts. We will learn nursery rhymes with actions that they can perform at home. Later in the term your child will be attending the library and bringing home a book to share with you.

Writing

Throughout the environment we have lots of opportunities for your child to mark make, both indoors and outdoors. Children will participate in small and large-scale mark making using paint, pencil, pen and chalk and messy play. Preparing them to hold their pencil correctly and have a good posture for writing.

Nursery Learning Overview Autumn 1 All About Me!

Expressive arts and Design

Your child will explore colour, texture and pattern using different resources. They will paint self-portraits and create their own models with a range of construction materials. The children will roleplay in our home corner and develop imaginative play with our small world objects.

Understanding the world

We will be encouraging your child to share things about themselves and their families. We will use 'Chatterboxes' to share things from home e.g. photographs. We will encourage children to identify, what they look like, who lives in their family, where they live and their likes and dislikes. We will also use the children's senses to notice changes in weather and the environment and the different signs of spring.

Mathematics

We will be learning number rhymes and counting songs to strengthen our number knowledge. We will be creating patterns, beginning to count and collecting objects to sort and organise. We will be exploring similarities and differences and matching objects by shape, colour and size. We will also be investigating groups with more and fewer objects.
